THE NEW HUMAN & OUR GALACTIC FUTURE

November 13th – 15th, 2026 Tiburon, CA Cost \$450

We are living through the most extraordinary moment in human history. Not because of what is breaking down — but because of what is breaking through. In us. Between us. All around us.

Something has shifted. You can feel it in the way love moves more openly now, in the way old certainties are falling away and something truer is taking their place.

This is not accident. This is evolution — and you are in the middle of it. The new human is emerging right now, through those willing to feel it, live it, and step forward. And we are not doing this alone. A greater galactic community of life is present in this unfolding, closer and more accessible than ever before.
